Shoresox™ History

SHORESOX™ was originally developed 12 years ago in the U.S Midwest to withstand the extreme weather variations including freeze/thaw cycles, ice sheeting, ice heaving, water fluctuations, etc.
SHORESOX™ has also achieved numerous accolades and testimonials from university research studies, government agencies, Erosion Control Magazine, and independent contractors in the United States and is now making its debut in Canada.
What is the ShoreSox™ System?

ShoreSox™ is the most innovative bioengineered “living system” developed to immediately halt soil erosion and stabilize shorelines and hillsides.
What is the ShoreSox™ System?

ShoreSox™ is multi-patented internationally. The patent also extends to growing and cultivating food sources for humans in the actual ShoreSox™ erosion control system.
Material Composition

• ShoreSox is made of a **biodegradable burlap fabric and heavy duty, photodegradable mesh**. This combination provides excellent water and heat retention, runoff filtration and outstanding durability.

• Common sizes for ShoreSox panels are **68” wide x 50, 100’ lengths**.
Before and After
Benefits

Eco-Friendly Solution designed with mother nature in mind.

“New innovative natural product, new long lasting results!”
Erosion control products that have been most commonly used do not offer the same advantages as SHORESOX.
How it Works

1. Place ShoreSox On Eroded Shoreline.
How it Works

2. Insert Locally Sourced Organic Media.
How it Works

3. Roll and Secure Shoresox System.
The ShoreSox™ Advantage

Optimum Safety
No exposed stakes virtually eliminates potential injury to humans and animals.
The ShoreSox™ Advantage

Lightweight
DIY with in-house employees. No heavy equipment needed.

Before/After

Witness how effective ShoreSox was at restoring and reclaiming this shoreline.

Nearly one year after the installation, we can see how the vegetation has grown and the shoreline is still intact.

10 months later
Testimonials...

We have installed over 1000 linear feet on lake banks at different locations at Tiburon Golf and Country Club. Six years after our first installation, the system has consistently proven to be highly effective at preventing erosion.
